FOUNDATION

2 friends, 1 idea that's how it all started. Being web3 enthusiasts since college and after experiencing the whole NFT market transformation we had an idea to launch our own company to provide the current market a legit and genuine profit making project .

Having a developer and an artist as Founders it became possible through GHOONS_NFT.

We plan to create a sensational and trusted name in market. To brief more on our aim we plan to start a chain of Crazy art and exemplary Web development work NFTs. To raise the standard of market and to give members valueable work for their hard-earned money.

We graciously welcome constructive input and insights into our endeavors.

HOW WAS GHOONS_NFT CREATED?

The project was programmed in Nov 2023 and has evolved ever since, We planned to launch Project X as our primary project on Solana after which we gained interest in SEI currency so we thought why not make a chain to connect both currencies and that's exactly what we plan to do , Ghoons will be low priced paid mint on SEI and true believers of the project will be given Free mints on Solana . Project X is our first planned free mint on Solana.

Inspired by the very best projects on both chains we're putting in efforts to create a project with genuine mint price and good return profit with valuable Utility.

WHAT IS PROJECT X ?

Project X lays the groundwork for the forthcoming era of freely available mint by Ghoons_NFT. It will be our free mint on Solana and will be launched soon(shortly within a week) after Ghoons's minted

Project X will be clean art and limited supply free mint. We're partnering with multiple airdrops for Project X members (Ghoons holders) and Project X holders.

Wallets will be introduced for members to earn points by staking our NFTs which will be traded for multiple airdrops

TEAM

Our team consists of 2 founders

Eric (@Eerie_Ghoons) – A Full stack Web developer by profession. He's been in Web3 space for over 7 years .

Worked as web developer with projects on Sei and Solana both. Eric's extensive experience is going to step up project's Web designing

Jino(@jino_69)- He's the artist of project. Been in Web3 space for almost 5 years .

Previously worked on many projects as Artist and a advisor! And also a pure Solana Degen!

We'll be hiring more peeps after discord launch so send in your entries and become a part of our exceptional venture

WHY GHOONS'S NOT A FREE MINT ?

Well we anticipated this question , to brief about it we would like you to take a look at the formerly minted free mints . Being the members of space ourselves we see a lot of free mints with no proper utility and minimal floor prices on secondary daily. We aspire for our project to transcend beyond the standards set by others and we figured that most important thing that those Free mint projects lacked were Funds and Ambition to provide.

We decided to use our own funds for Ghoons and create something that can actually be profitable for long term holders and not only paperhands . But to continue and provide good utility to members we need to generate a handful of funds and that's why we decided to make Ghoons a paid mint , but we promise the community that mint prices will be minimal and 90% of the profit will go back to community through good utility free mints.

We need your trust and support to achieve our shared goals.

Partners

We're looking to collab with following Sei-Solana projects and will ensure that most of the names will be checked out from this list as these collaborations will serve as a gateway to gather crowd in a server that understands and values the project.

- Seiyans
- Ghosty
- Seimurai
- CAPPYS
- Sensei Ducks
- The Colony
- Fooks
- Skult
- Degods

Etc

Currently in talk with most of them and hope to agree with them on common grounds. Made 1/1's for collabs.

Apart from these there are lots of spots that will be offered through twitter to upcoming valued projects on chains

SERVER

Ghoons twitter has already been launched on Feb 18th 2024 and soon we're gonna launch our discord server for Sneak peeks and WL allocation for project majorly.

Discord Server will serve as an easier platform for us to hear suggestions from Ghoon's believers and to interact with them better.

We are designing and planning to give the best server experience by introducing Bots and Channels to have more fun in server rather than just Grinding.

Tell us your Paranormal experiences in server and win exciting prizes (based on votes), you can also share creepy posts and stories with us . Engage with us on discord and share your crazy ideas and we'll handpick them for direct money rewards post mint.

RoadMap

What we've done so far?

- Beginning of Ghoons – Nov 2023
- Got Project X art ready by Dec 2023
- Started planning for Ghoons art from Jan 2024
- WhitePaper and Collaboration talks – 10th Jan 2024
- Website Development work finished – 6th Feb 2024
- Twitter Launch – 18th Feb 2024
- Telegram and Instagram Launch- 20th Feb 2024

RoadMap

What are we planning to achieve?

- Website live – 22th Feb
- Post info about upcoming partner airdrops
- Start WL allocation through twitter
- Launch Discord and Start cross project collabs
- Wallet submission and Live LaunchPad
- Holders Dao and Introduce Art for Project X
- Reveal partner airdrops for Project X and give pending rewards to Ghoons holders
- Live Project X website and Twitter
- Allocate spots and deliver our future plans with Project X and after that.
- Plan our merchandise for Ghoons_NFT .

Tokenomics

Unlike most we are not gonna launch any worthless token and fud the holders by showing fake profit promises

But we're in talk with some Airdrops and after things go smoothly then holders will get multiple token airdropped from these Airdrops.

More info on how to gain the tokens will be released soon.

Partnering airdrops will be mentioned here and will be updated in whitepaper soon.

Our main utility will come from Token Airdrops and Free mints associated with Ghoons_NFT.

P2E Platform

Our Play&Earn platform provides an opportunity to get extra funds. However, the way the user earns them in this case is by completing specific tasks, which can take place in the Ghoons ecosystem or externally. All the user needs to do is to choose a task that appeals them to complete certain quests.

Quests will be in form of mobile game(s) and users will gather points by engaging.

Airdrops directly to wallets. Connecting wallet prototype will be added to Ghoons_NFT official website (ABOUT US).

Partnership infos and date updates will be posted on ProjectX twitter handle - @Project_X

Merchandise

We always wanted to have our own Merchandise that people would love to collect

We'll take a vote on our twitter after the launch of Project X and Ghooons Mint to have our own merchandise and If we get a positive response then we already have our Merchandise idea planned .

Merchandise will be released after Project X mint possibly in March End.

Get ready to grab our cool merchandise designed by our own artist team with immense work.

Vision & Conclusion

Lastly we just want to remind everyone that we're here to share common goals with you. We are not here to provide penny profits and with all the planning we surely won't end up like that.

We wanted to create a sensational company and here at Ghoons you'll experience all kinds of crazy shit – of course the good ones, become a part of our journey and you'll surely love to keep us in your portfolio.

A few last minute changes may occur and will be notified on Twitter regarding date changes but the entire RoadMap will follow exactly the same.

Follow us and trust the process we've got crazy utilities and additional benefits coming for you.

No Supply cut , No worthless airdrops , No high priced shitty project we're here to bestow :

- Crazy illustration
- High standard Web work cause it's Web3 !!
- Good and valuable utility
- 90% profit to DAO and the rest for our team expenses
- Create something of value and trust
